How to Submit Your Bid on the Platform?

1. Recommendations and Prerequisites p.2
2. Simplified Submission p.5
3. Java Applet Submission p.11

Recommendations

Dematis

For each electronic submission, we recommend the following security principles:

- Perform 48 hours before the response deadline a complete prerequisites test (accessible from your private space under the Help/Prerequisites section).
- Optimize your files to limit the total size of your submission . We recommend not exceeding 200 MB, in order to guarantee submission within the best timeframes.
- Submit your bid 24 hours before the deadline for submission.

In case of difficulty, we invite you to contact the assistance service as soon as possible via the online chat available on all pages of the site, at the bottom right. They can, if necessary, perform remote assistance on your workstation or assist you with an emergency submission.

The platform assistance is not required to intervene and does not guarantee any result on an intervention taking place in the last hour preceding the deadline for submission of bids.

Presentation of the 2 Submission Methods

Dematis

The platform offers you 2 submission methods detailed in the following pages of this guide.

- **Simplified submission** recommended : this submission method is ideal for quick submission without signature or for already signed documents. *You can sign your documents using our signature service (free)* https://www.e-signaturesecurisee.com/

- **Java applet submission** : this submission method allows you to electronically sign your files and encrypt them from your workstation before sending. See the technical prerequisites on the next page.

Prerequisites

Dematis

In order to submit a **dematerialized bid** , you must:

- **For Java submission** , have JAVA software on your workstation (Java 8 update 101 minimum, or open source equivalent) and ensure you have only one version installed , previous versions must be uninstalled.
  If needed, download JAVA from the Help/Software Menu.

- Authorize the domain **tawk.to** to benefit from the online assistance system.

- Ensure that the files to be transmitted are local on your workstation and not on a server.

Simplified Submission: Access

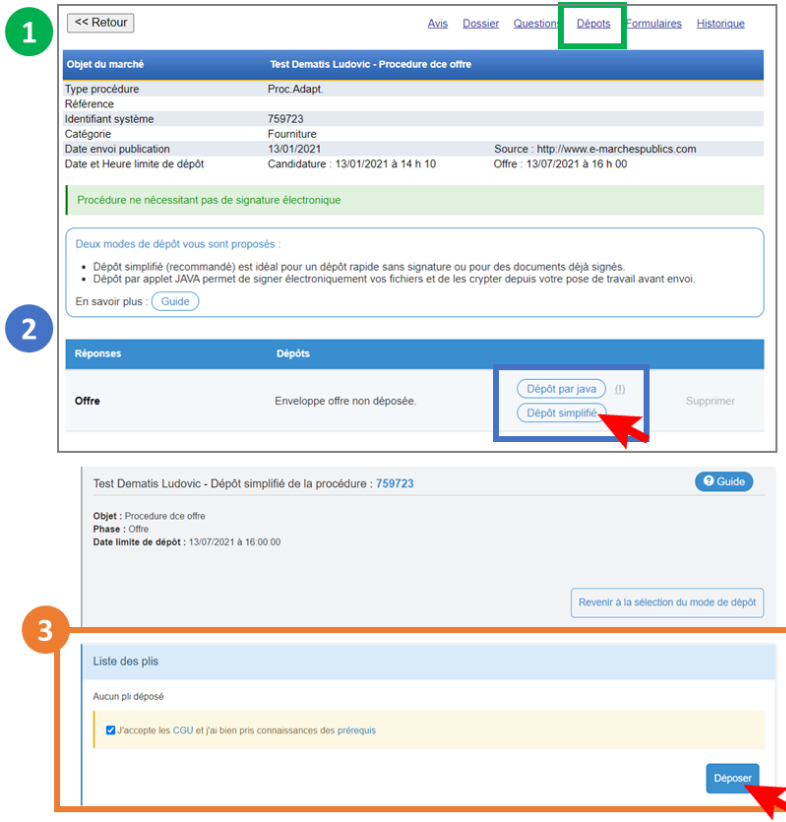

Dematis

Once connected to the platform, from the market you wish to respond to:

1. Click on the link Deposit in the sub-menu

2. Then choose the mode Simplified Deposit

3. On the next page, after accepting the **general conditions** and acknowledging the **prerequisites**, click on the button Deposit to start your submission.

Simplified Submission: Lot Selection

Dematis

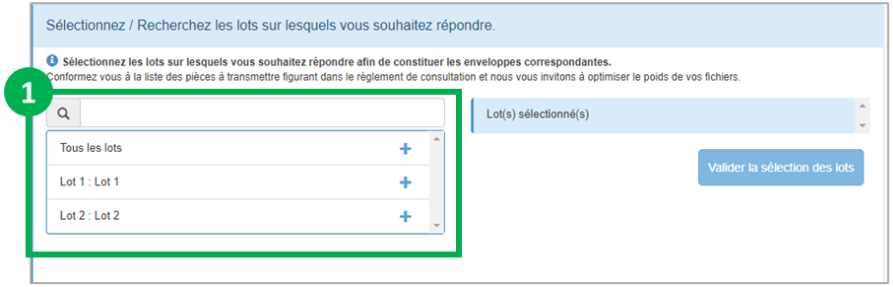

If the procedure includes multiple lots

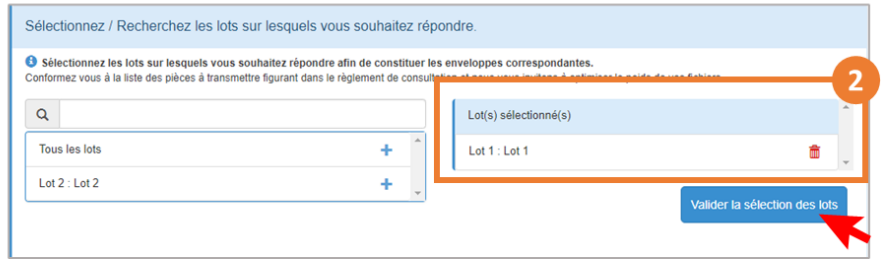

1. From the dropdown menu on the left, add the lots you wish to respond to using the +

   You can use the magnifying glass 🔍 to search or filter a lot from a word or group of keywords.

2. The selected lots then appear in the right part of your screen.

Once your lots are selected, proceed to the next step by clicking on the button Validate lot selection

If you want to respond to all lots, 2 solutions

- Select "All lots" - in this case a single envelope will be created to post your files.
- Select all lots one by one - in this case an envelope will be created for each lot.

Please note: The selection of lots is limited to 10. If you wish to deposit on a larger number, it is advisable to make a first deposit of 10 lots and then repeat the operation for the

Simplified Submission: Presentation and Navigation

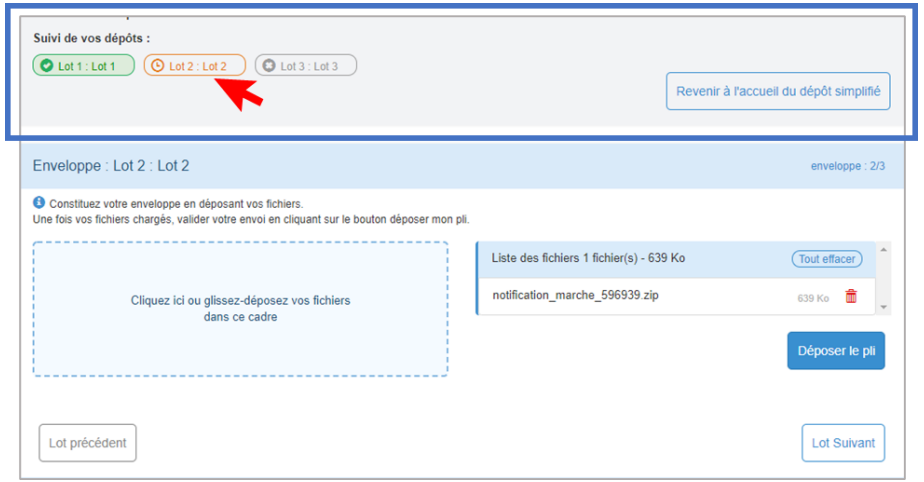

Dematis

The simplified submission allows great fluidity in managing your submissions by lot.

For each selected lot, you will need to create and submit your envelopes **one by one** .

You can track the status of your submissions and navigate from one envelope to another using the Next Lot / Previous Lot buttons or by clicking on the dots.

A color code allows you to quickly visualize the status of each envelope:

- Lot 1 : Lot 1 — Your bid is properly submitted
- Lot 2 : Lot 2 — Your files are loaded but bid not submitted
- Lot 3 : Lot 3 — Empty envelope

Note: If you need to interrupt your work, know that your non-submitted envelopes (in orange) will be saved. You can therefore find your envelopes in their state ready to be completed and submitted.

Simplified Submission: Process 1/2

Dematis

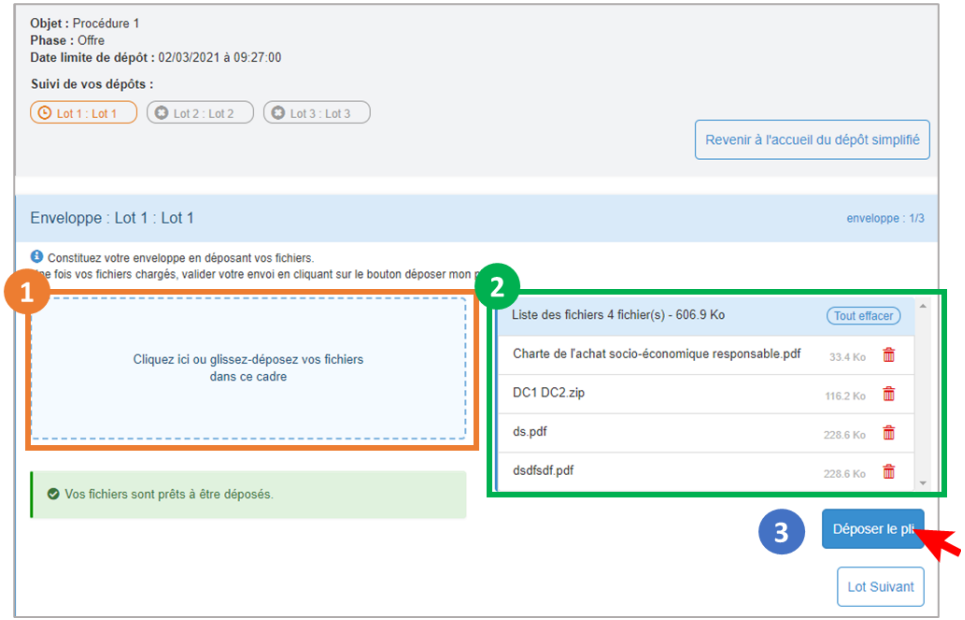

To create your envelope:

1. **Add your documents** by clicking or dragging your files into the reserved frame. This operation may take some time depending on the number and weight of your files.

2. **Once loaded, your documents** are displayed in the list on the right side of your screen.

3. Make sure to validate your submission by clicking on:

   Submit the bid

You can move to the next lot using the button available at the bottom right, and repeat this operation for each lot.

Simplified Submission: Process 2/2

Dematis

Once your bid is submitted, a message confirms the proper receipt of your submission.

At the same time, we invite you to:

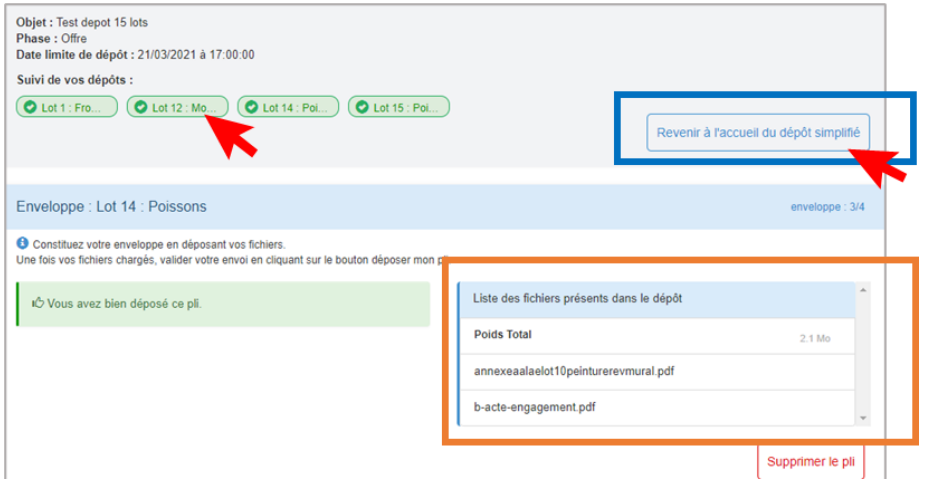

- Download your backup copy offered for download
- Keep the proof of your submission sent within minutes to the email address linked to your account.

The list of submitted files

is visible on the right side of the screen.

You can check the status and content of each envelope by clicking on the corresponding dot .

Once all your envelopes are submitted (in green), you can return to the home page .

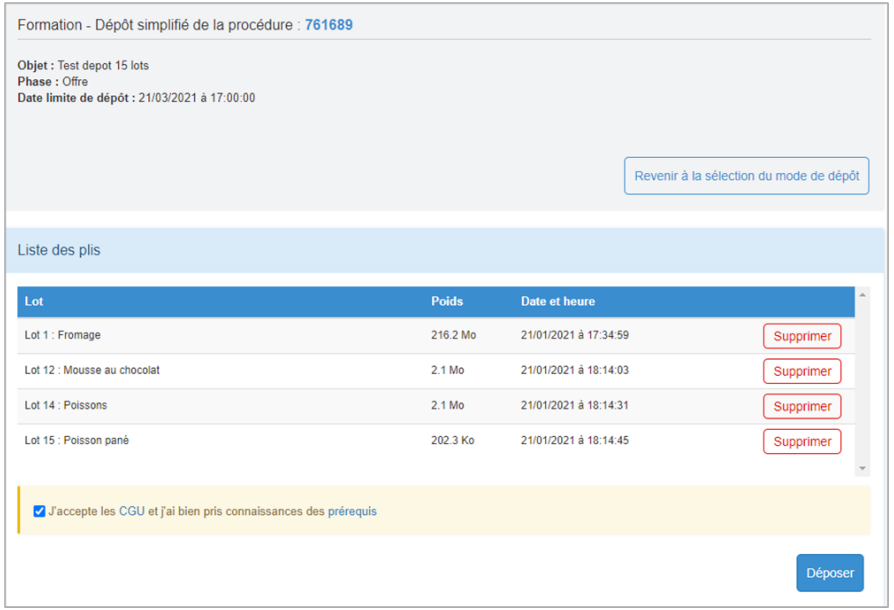

Simplified Submission: Return to Home

Dematis

On the simplified submission home page, you can find the list of all bids submitted for this procedure.

If you wish to complete your submission on new lots of this procedure, you should click on Deposit and select the lots you want to submit on.

Deposit by Java applet: Access

Dematis

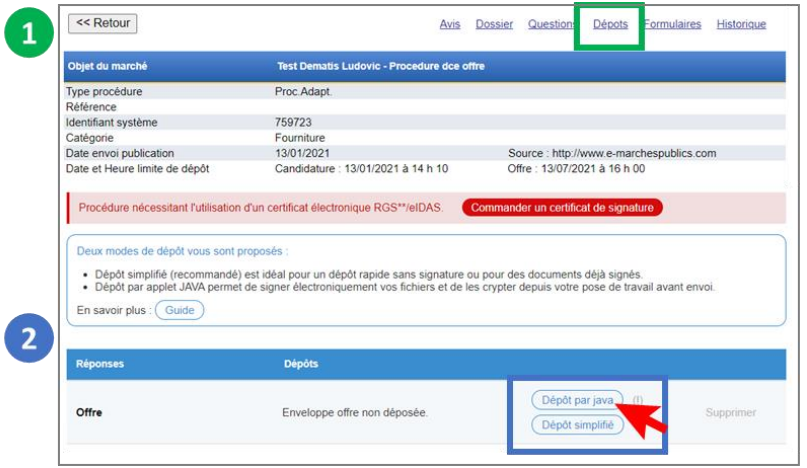

Once connected to the platform, from the market you wish to respond to:

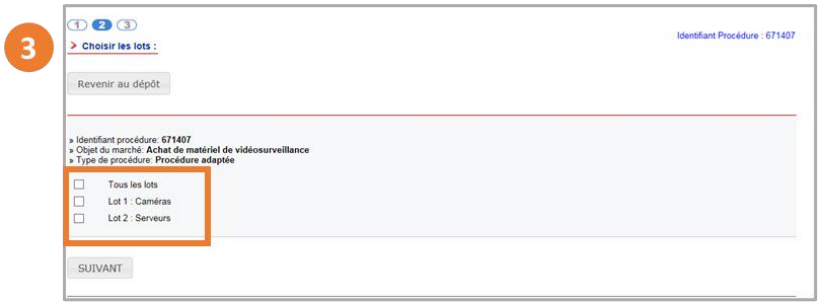

1. Click on the link Deposit in the sub-menu

2. Then choose the mode Java Submission then accept the **general conditions** having acknowledged the **prerequisites**.

3. If the market includes multiple lots, you will need to select the lots for which you wish to submit a bid.

Proceed to the next step to launch the submission application.

Java Applet Submission: Launching the Application from Windows

Dematis

At step 3, Launch the application to load your files.

This application allows you to sign your documents (optional) and encrypt your data during sending.

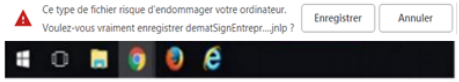

The application «DematSign.jnlp» loads at the bottom of your browser. Click on the application and wait a few moments.

Depending on browsers you will have the following screens:

Google Chrome

1- Click on [Save] to save the application on your workstation

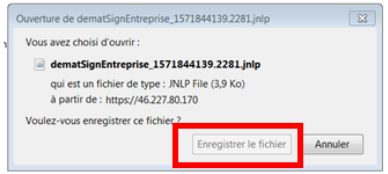

2- Then [double-click] on dematSign at the bottom left

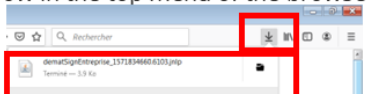

Mozilla Firefox

1- Click on [Save] to save the application

2- Then [Open] the file accessible from the arrow in the top menu of the browser

Internet Explorer

1- Click on [Execute] to launch the application.

Java Applet Submission: Launching from Mac OS

Dematis

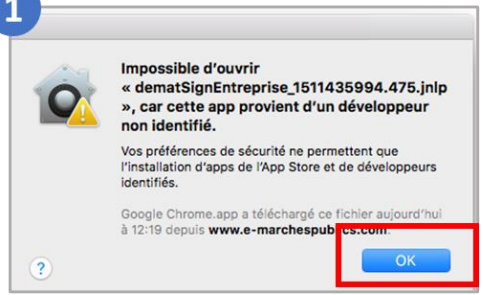

To function, it is **imperative to use a Mac from OS 10.7** .

When executing the application, authorize the application that will be automatically blocked by the system image 1

After clicking OK, go to **System Preferences** image 2

In **System Preferences** go to " **Security and Privacy** " image 3
then in the **General** tab, click on the " **Open anyway** " button image 4 .

Java Applet Submission: Document Loading

Dematis

Once the application is executed you will have:

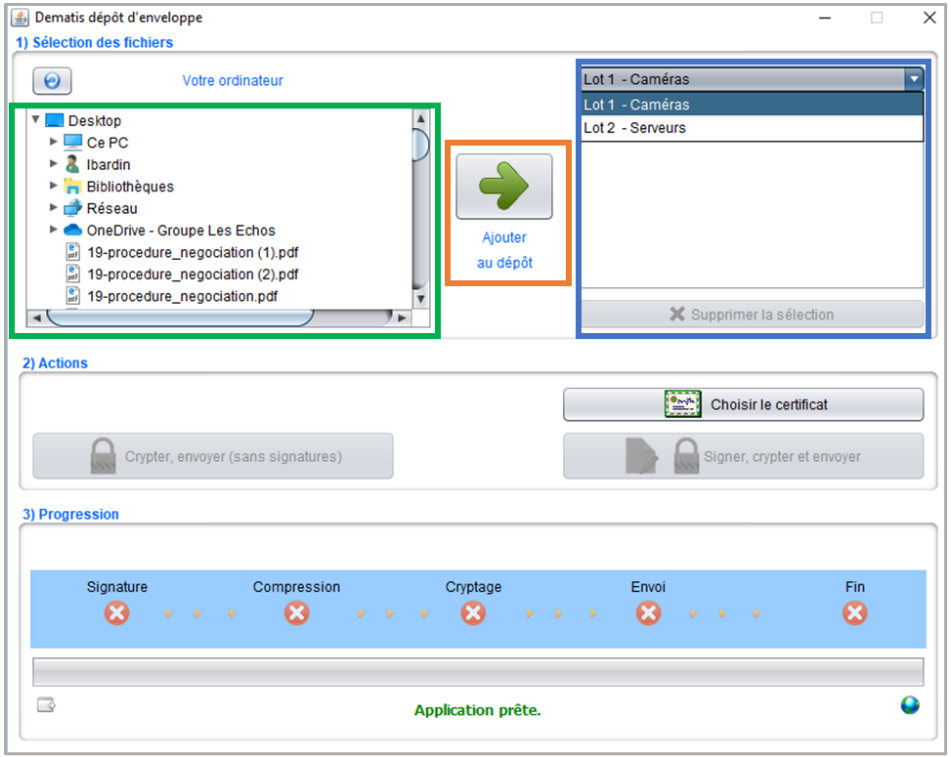

- on the left , the content of your workstation,
- on the right , the content of the envelope(s).

To submit your documents in the envelope:

- Select your documents / folders on the left
- Click on the middle arrow to add them.

Your documents are now visible in the content of the envelope(s) on the right .

Attention: make sure your documents are saved on your workstation and not on a server or external disk.

Java Applet Submission: Document Loading

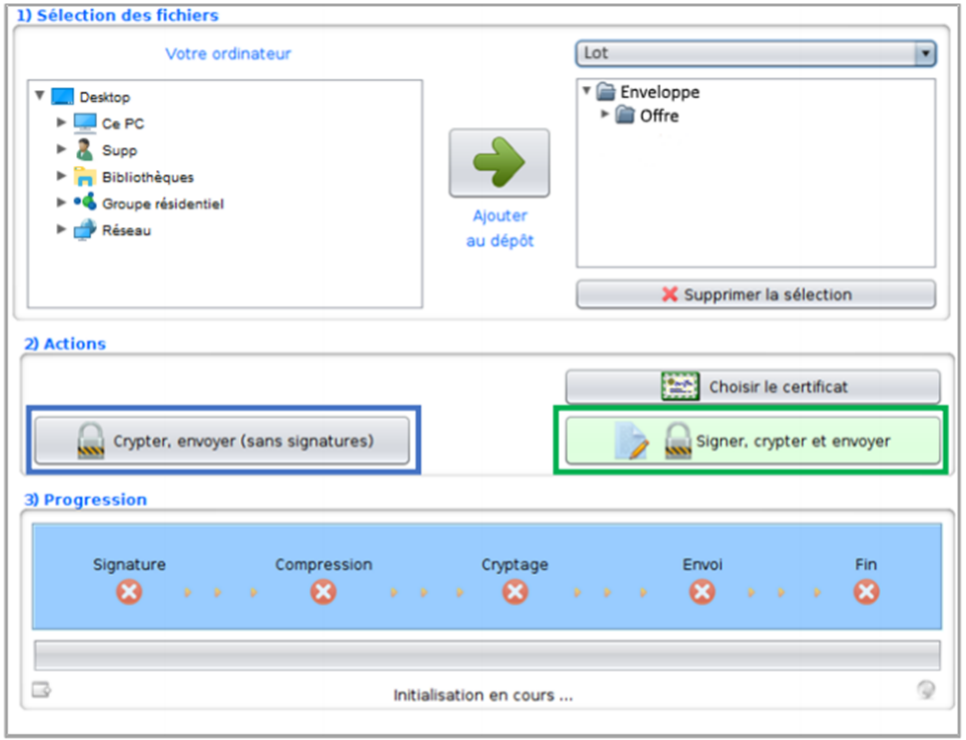

Dematis

Once your documents are added, two choices are available for sending:

- Submission without electronic signature, button [Encrypt, send (without signature)] .

- Submission with electronic signature, button [Sign, encrypt and send] . Don't forget to choose your certificate before **Signing** .

Attention: depending on the file size and your connection speed, the download may take more or less time.

Once the sending is complete

a message appears indicating that the submission went well.

In parallel, a confirmation of your submission will be sent to you by email. Check the list of transmitted documents and please keep this email which constitutes your proof of submission.

Important: it is the end of transmission time that will be retained as the submission time of your bid and not the time at which the download began.
